

BAMBIN**o** bougs

Miski(b) Released Spring 1998
Landscape, Courtyard Pots, Formal Standards and Baskets. Height in garden 60 cm - 90cm

Miski(b) is a really stunning plant when in flower. The leaves of the plant are variegated white and green, when the flowers appear in large numbers they are Irridescent Orange, the colour contrast is magic. **Miski**(b) likes to grow in full sun where flowering is heaviest over many months of the year. The plant is a very tidy grower which makes it very easy to grow in a large courtyard pot or hanging basket. Tip pruning from time to time is all that is needed to keep the plant compact.

USES:- **Miski**(b) is long flowering so is ideal for container culture. Make sure that the plant is kept moist but not overwet. In a hanging basket it is really important to use a large basket to give the plant room to mature, this will result in more flowers. Used in gardens as an individual specimen or in group plantings **Miski**(b) will grow well in most soil conditions.

ZONES:-

In Gardens

In gardens and pots

For the Homeowner

- Extremely free flowering
- Blooms right through until cooler months
- Versatile

Planting

Plant in courtyards, patio pots, baskets, garden beds or window boxes. Formed standards.

Placement

Place in bright, full-sun areas.

Temperature

Heat and drought tolerant to 38°C once established

Grows well in cool areas

Light frost tolerant

Watering

Keep on the dry side to encourage heavier flowering.

Fertiliser

Use slow release fertilisers with an even balance of NPK, they are heavy feeders.

Pruning

Trim as desired, but it is not necessary to maintain flowering.

For the Grower

Planting

Timing : Spring - Summer - Autumn

Plants per pot: One only

Finish time: 10-12 weeks from potting

Soil: A general shrub mix

pH: Neutral to slightly acid

Light Levels: High, even full sun.

Temperature A growing house with good ventilation and held above 10°C.

Water Requirements Average, avoid wilting.

Fertiliser - either 1 or 2

1. Constant feed: Every two weeks with a general liquid fertiliser.

2. Slow Release: Slow release fertiliser with an NPK ratio in even balance and with trace elements added.

Pinching: Pinch tubes prior to potting. Tip prune to shape the plant as needed.

Growth Regulators: Not needed.

Pest Control: Control aphids. In cool weather if the leaves are wet leaf spot can develop.
