

Maudi(♠) Released Spring 2006

Released Spring 2005

Landscape, Courtyard Pots and Baskets

Height in garden 1m.

Maudi(♠) has to be one of the best container grown plants available. It has a distinctive purple red flowers which are borne in terminal heads over the bush. Flower heads need removing as they fade. This starts another burst of blooms. The plant looks good in sunny situations where it stands most weather.

USES:

Maudi(♠) makes an ideal plant for large patio containers but is also use in garden beds and hedges. With little training it will maintain its shape. In containers keep moist at all times. If planted to spill over walls or banks the plant will need tip pruning to get the basic shape right to follow the shape of the bank.

ZONES:

In Gardens

In gardens and pots

For the Homeowner

- Extremely free flowering
- Blooms for most months of the year
- Good foliage and bloom contrast.

Planting

Plant in courtyards, patio pots, baskets, garden beds and window boxes.

Placement

Plant in brighter , full sun areas.

Temperature

Grows well in most sunny areas

Heat tolerant to 90-95°c

Frost tolerant to 10°c

Watering

Keep on the dry side to encourage heavier flowering.

Fertiliser

Use slow release fertilizers with an even balance of NPK, they are heavy feeders.

Pruning

Trim as desired during the cooler months of the year.

For the Grower

Planting

Timing : Spring - Summer - Autumn.

Plants per pot: One only

Finish time: 10-12 weeks from potting

Soil: A general shrub mix

pH: Neutral to slightly acid

Light Levels: High, even full sun.

Temperature A growing house with good ventilation and held above 10°c.

Water Requirements Average, avoid wilting.

Fertiliser - either 1 or 2

1. Constant feed: Every two weeks with a general liquid fertiliser.

2. Slow Release: Slow release fertiliser with an NPK ratio in even balance and with trace elements added.

Pinching: Pinch tubes prior to potting. Tip prune to shape the plant as needed.

Growth Regulators: Not needed.

Pest Control: Control aphids. In cool weather if the leaves are wet leaf spot can develop.
